Procedure:

The method of testing was that described in **16 CFR 1500.44** of the *Federal Hazardous Substances Act* and *ASTM F963-07e¹* for rigid and pliable solids.

Requirement:

A material is considered "flammable" if it ignites and burns with a self-sustained flame at a rate greater than 0.1 inches per second along its major axis.

NOTE:

It is our understanding that a sample is considered as having passed the test requirement if it self-extinguishes before burning 6 inches and prior to the lapse of 60 seconds.
